

## Medical Practice Group Competency Checklist

Name : \_\_\_\_\_

Date : \_\_\_\_\_

Our EMR, the Online Clinical Information System (O-CIS), simplifies daily workflows across emergency, urgent care, wellness, and outpatient services. By streamlining documentation and reducing errors, it keeps everything accessible in one place—from urgent medical histories to routine wellness plans—allowing our healthcare professionals to focus entirely on the patient.

This checklist is designed to help staff navigate O-CIS effectively. Using it ensures consistent, accurate documentation and optimizes patient safety across all practice areas.

| Materials                                 | Legend                                |
|-------------------------------------------|---------------------------------------|
| Computer with access to O-CIS Environment | <b>D</b> = Done; <b>ND</b> = Not Done |

  

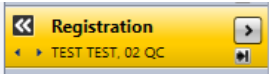

| ACCESSING O-CIS                                                                                                                                                             | D | ND |

A <b>Contact Information Add/Edit</b> window will appear, fill out required fields                                                                                                                                                                                                                                                                                                                                                                 |          |           |
| 18. Click the <b>Visit Demographics</b> tab. Fill out required fields.                                                                                                                                                                                                                                                                                                                                                                                 |          |           |
| 19. Click on <b>Location</b> tab. In the <b>Assigned Section</b> , Click the  button                                                                                                                                                                                                                                                                               |          |           |
| 20. In the Location Census Type section, <b>tick both Licensed and Non-Census</b>                                                                                                                                                                                                                                                                                                                                                                      |          |           |
| 21. In the <b>Unit</b> dropdown, select <b>your Department</b>                                                                                                                                                                                                                                                                                                                                                                                         |          |           |
| 22. Then click <b>Search</b> . Under the Search Results section, Select the LOCATION                                                                                                                                                                                                                                                                                                                                                                   |          |           |

|                                                                                                                                                                                                                         |          |           |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|-----------|
| based on triaging. Click                                                                                                               |          |           |
| 23. Click the <b>Forms</b> tab. Select/Tick the items that need to be printed<br><i>*Number of copies may be edited</i>                                                                                                 |          |           |
| 24. Click the <b>Digital Forms</b> tab. Click on the Admission forms/consents that need to be signed by the Patient/Representative.                                                                                     |          |           |
| 25. Click  and then                                   |          |           |
| <b>SCANNING OF PAPER-BASED DOCUMENT VIA OPAL</b>                                                                                                                                                                        | <b>D</b> | <b>ND</b> |
| 1. From the <b>Menu Bar</b> click  button and click  |          |           |
| 2. Load and scan document/s in the scanner.                                                                                                                                                                             |          |           |
| 3. Select the necessary <b>Document Type and Date</b> .                                                                                                                                                                 |          |           |
| 4. Click  button.                                                                                                                      |          |           |
| 5. Click  button.                                                                                                                      |          |           |
| <b>LOGGING IN TO SLB</b>                                                                                                                                                                                                | <b>D</b> | <b>ND</b> |
| 1. Open a browser then go to <a href="http://10.10.60.95:8081/login">http://10.10.60.95:8081/login</a> (Test Environment)                                                                                               |          |           |
| 2. Enter your <b>User name</b> and <b>Password</b> .                                                                                                                                                                    |          |           |
| 3. Click the <b>LOGIN</b> button.                                                                                                                                                                                       |          |           |
| <b>UPDATING ACCOUNT CLASS IN SLB</b>                                                                                                                                                                                    | <b>D</b> | <b>ND</b> |
| 1. Select <b>E.R. Landing Page</b>                                                                                                                                                                                      |          |           |
| 2. Input patient's information in the search bar. Click <b>Search</b> .                                                                                                                                                 |          |           |
| 3. Once a patient is selected, select <b>Update Financial Class</b> in the Action dropdown. Then click submit.                       |          |           |
| 4. Select the appropriate Account Class provided by the patient. ( <i>Example: Individual, HMO etc.</i> )                                                                                                               |          |           |
| 5. Once all required fields are filled out, click <b>Save/Save Print</b> .                                                                                                                                              |          |           |
| <b>SCHEDULING OUTPATIENT VISITS FOR REGISTERED PATIENTS</b>                                                                                                                                                             | <b>D</b> | <b>ND</b> |
| 1. Click on the  <b>Scheduling</b> module.                                                                                           |          |           |

|                                                                                                                                                                                                                                                  |          |           |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|-----------|
| <div>Resources</div>                                                                                                                                            |          |           |
| 2. Click the bed button  to add location resource                                                                                                               |          |           |
| 3. Choose the <b>Facility Location and Unit</b> via dropdown and click                                                                                        |          |           |
| 4. Left click to highlight the room of choice and click                                                                                                         |          |           |
| 5. Right-click on the available Time Slot and go to <b>Schedule &gt; Demand Book</b>                                                                                                                                                             |          |           |
| 6. Fill-out the Last Name, First Name, Middle Name and Birth Date fields.                                                                                                                                                                        |          |           |
| 7. Click the  button.                                                                                                                                           |          |           |
| 8. Select the correct patient and click the  button.                                                                                                            |          |           |
| 9. Click on the <b>Patient Demographics, Patient Supplemental and Visit Supplemental</b> tabs. Each tab will show a green check mark (  ) once you pass them. |          |           |
| 10. Click on the <b>Book Appointment</b> tab.                                                                                                                                                                                                    |          |           |
| 11. Choose the duration of the appointment from the <b>Event</b> dropdown menu.                                                                                                                                                                  |          |           |
| 12. Click the  button.                                                                                                                                        |          |           |
| 14. <b>Appointment Recap</b> will appear. Click the  button.                                                                                                  |          |           |

| 1. Select the Patient from the list.                                                                                                                                                                                                                                                                                                             |  |  |   |    |
| <br>2. Click the <b>Worklist Manager</b> from the Main Toolbar.                                                                                                                                                                                                 |  |  |   |    |
| DOCUMENTING A REGULAR MEDICATIONS (MARK AS DONE)                                                                                                                                                                                                                                                                                                 |  |  | D | ND |
| 1. Click on the dropdown and select "Medications (eMAR) 24h Selected Patient"                                                                                                                                                                                                                                                                    |  |  |   |    |
| 2. Right click on the specific time cell the task was performed.                                                                                                                                                                                                                                                                                 |  |  |   |    |
| 3. Select                                                                                                                                                                                                                                                       |  |  |   |    |
| 4. <b>Barcode Verification Override Reason</b> window will appear. Choose <b>No Barcode Present</b> as the reason.                                                                                                                                                                                                                               |  |  |   |    |
| 5. Click the  button.                                                                                                                                                                                                                                          |  |  |   |    |
| 6. A <b>Sunrise Clinical Manager</b> window will appear. "This order has not yet been verified by the pharmacy." Click <b>OK</b> .                                                                                                                                                                                                               |  |  |   |    |
| 7. <b>Rx Verify Documentation Override Reason</b> window will appear. Select "Emergency Situation" in the dropdown. And click OK.                                                                                                                                                                                                                |  |  |   |    |
| 8. Fill out the  <b>required field/s</b> and click <b>OK</b> .                                                                                                                                                                                                |  |  |   |    |
| DOCUMENTING A HIGH ALERT MEDICATIONS (MARK AS DONE)                                                                                                                                                                                                                                                                                              |  |  | D | ND |
| For High alert medications (HAM), a Witnessed/Co-Signature is required to validate.                                                                                                                                                                                                                                                              |  |  |   |    |
| 1. Click  icon.                                                                                                                                                                                                                                               |  |  |   |    |
| 2. In the Cosign window, input the <b>username and password</b> of the co-signer.<br><i>The co-signer will input all the details needed.</i>                                                                                                                                                                                                     |  |  |   |    |
| RESCHEDULING A MEDICATION TASK (WORKLIST MANAGER)                                                                                                                                                                                                                                                                                                |  |  | D | ND |
| 1. In the Worklist Manager, right click on the time cell of the medication that needs to be adjusted and click the Reschedule option to reveal additional options: <ul style="list-style-type: none"> <li>a. This Instance - Reschedule a selected task only</li> <li>b. All Instances - Reschedule all tasks (current and/or future)</li> </ul> |  |  |   |    |
| 2. On the <b>Tasks: Reschedule</b> window, fill-out <b>Moved Scheduled Tasks</b> hours and/or minutes as necessary                                                                                                                                                                                                                               |  |  |   |    |
| 3. Provide <b>Reason</b> from the dropdown list.                                                                                                                                                                                                                                                                                                 |  |  |   |    |
| 4. Click  button                                                                                                                                                                                                                                              |  |  |   |    |

| TRANSFER TO UNIT (FOR ADMISSION)                                                                                                                                                                                                                                                                                          |   |    |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|----|
| REMOVAL OF ED ATTENDING TAGGING                                                                                                                                                                                                                                                                                           | D | ND |
| 1. Click  in the chart tab-level tool bar                                                                                                                                                                                                |   |    |
| 2. On the left side under <b>Summary Views</b> , Select <b>Care Providers</b>                                                                                                                                                                                                                                             |   |    |
| 3. To remove, highlight and double click on the Name of the ED Attending MD                                                                                                                                                                                                                                               |   |    |
| 4. A window will appear with the Care Provider Details, Input the <b>End Date &amp; Time</b><br>                                                                                                                                         |   |    |
| 5. Double check the details before clicking <b>OK</b> .<br><i>Once done, the tagging will be automatically removed and will be seen if Show Inactive is ticked</i>                                                                                                                                                        |   |    |
| ACCESSING PATIENT FLOW                                                                                                                                                                                                                                                                                                    | D | ND |
| 1. Ways to access:<br> <ul style="list-style-type: none"> <li>Through <b>Citrix Apps</b></li> <li>Utilizing <b>Menu Bar</b> in OCIS<br/> </li> </ul> |   |    |
| 2. Enter <b>User name</b> and <b>Password</b> . And click Login.                                                                                                                                                                                                                                                          |   |    |
| 3. To request a job, click                                                                                                                                                                                                             |   |    |
| 4. A new window will appear, choose the corresponding unit in <b>Request Type</b> (i.e. <b>FME- Electrical Engg</b> to request for replacement of busted lights)                                                                                                                                                          |   |    |
| 5. Click <b>GO</b>                                                                                                                                                                                                                                                                                                        |   |    |
| 6. Fill out the necessary details needed(with asterisk*): <ul style="list-style-type: none"> <li><b>Priority</b> -Routine, High, Low</li> <li><b>To:</b> input the current location</li> </ul>                                                                                                                            |   |    |
| 7. Choose the job you wish to fulfill by ticking the checkboxes                                                                                                                                                                                                                                                           |   |    |
| 8. Use <b>Notes</b> for more details and other instructions.                                                                                                                                                                                                                                                              |   |    |
| 9. | VIEWING AND/OR RESOLVING PENDING AND INVALID TRANSACTIONS IN SLB                                                                                                                                                                                                                                                                         |  |  |  |
| 1. Select your Unit's Landing Page                                                                                                                                                                                                                                                                                                       |  |  |  |
| 2. Enter the patient's PIN                                                                                                                                                                                                                                                                                                               |  |  |  |
| 3. In the Action column, select <b>Pending/Invalid Transactions</b> in the drop down menu                                                                                                                                                                                                                                                |  |  |  |
| 4. Identify which department is responsible for resolving the Pending/Invalid Transaction<br>( <i>Pharmacy Dispensing, Pathology, Nursing Unit, IT, etc.</i> )                                                                                                                                                                           |  |  |  |
| CHECKING OR ADDING PROFESSIONAL FEES                                                                                                                                                                                                                                                                                                     |  |  |  |
| 1. In the Unit's Landing Page, search for the patient's PIN                                                                                                                                                                                                                                                                              |  |  |  |
| 2. In the Action column, select <b>PF Encoding</b> in the drop down menu                                                                                                                                                                                                                                                                 |  |  |  |
| 3. Click  and  to add or  to edit/delete the selected doctor's professional fee |  |  |  |
| 4. Input PF Type, PF Amount then click  and  .                                                                                                                    |  |  |  |
| TAGGING PATIENT FOR BILLING DISCHARGE IN SLB                                                                                                                                                                                                                                                                                             |  |  |  |
| 1. In the <b>ER Landing Page</b> , search for the patient's PIN                                                                                                                                                                                                                                                                          |  |  |  |

|                                                                                                                                                                                                                                                                                                                                                                                                                                              |          |           |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|-----------|
| 2. In the Action column, select <b>For Billing Discharge</b> in the drop down menu<br><br><b>Note:</b> Will only appear when the patient's account has <b>NO</b> Pending/Invalid Transactions and a CORE Discharge Order has been made by the attending service.                                                                                                                                                                             |          |           |
| <b>ENTER READY FOR BILLING IN OCIS</b><br>The <b>Ready for Billing</b> order in OCIS stops further orders from being entered in the patient's chart.                                                                                                                                                                                                                                                                                         | <b>D</b> | <b>ND</b> |
| 1. Click  from the Patient Banner.                                                                                                                                                                                                                                                                                                                          |          |           |
| 2. Tick the "Me" option under the " <b>Requested by</b> " section and click the  button.                                                                                                                                                                                                                                                                    |          |           |
| 3. Search " <b>Ready for Billing</b> " using the Order Entry Worksheet.                                                                                                                                                                                                                                                                                                                                                                      |          |           |
| 4. Select the " <b>Ready for Billing</b> " result and click the  button.                                                                                                                                                                                                                                                                                   |          |           |
| 5. Click the " <b>Submit Order(s)</b> " button on the Order Entry Worksheet.                                                                                                                                                                                                                                                                                                                                                                 |          |           |
| 6. Input your password and click the  button to authenticate the order.                                                                                                                                                                                                                                                                                     |          |           |
| <b>DISCHARGING VISIT AND REMOVAL OF PATIENT IN THE TRACKING BOARD</b>                                                                                                                                                                                                                                                                                                                                                                        | <b>D</b> | <b>ND</b> |
| 1. Once patient is cleared for discharge from <b>BILLING</b> , Click <b>Registration</b> in the Menu Bar                                                                                                                                                                                                                                                                                                                                     |          |           |
| 2. Select <b>Visit Maintenance</b> then <b>Discharge Visit</b>                                                                                                                                                                                                                                                                                                                                                                               |          |           |
